4. Emma Goble, b. 1862.

Miss Emma Goble Lathrop, official historian of the New York Chapter of the Daughters of the American Revolution, is one of the youngest members to hold office, but one whose intelligence and capability qualify her for such distinction. Miss Lathrop is not without experience; in her present home and native city, Newark, N. J., she has filled the positions of secretary and treasurer to the Girls' Friendly Society for nine years, secretary and president of the Woman's Auxiliary of Trinity Church Parish, treasurer of the St. Catherine's Guild of St. Barnabas Hospital, and manager of several of Newark's charitable institutions which her grandparents were instrumental in founding. Miss Lathrop traces her lineage back through many generations of famous progenitors on both sides. Her maternal ancestors were among the early settlers of New Jersey, among them John Ogden, who received patent in 1664 for the purchase of Elizabethtown, and who in 1673 was

Miss Emma Goble Lathrop, official historian of the New York Chapter of the Daughters of the American Revolution, is one of the youngest members to hold office, but one whose intelligence and capability qualify her for such distinction. Miss Lathrop is not without experience; in her present home and native city, Newark, N. J., she has filled the positions of secretary and treasurer to the Girls' Friendly Society for nine years, secretary and president of the Woman's Auxiliary of Trinity Church Parish, treasurer of the St. Catherine's Guild of St. Barnabas Hospital, and manager of several of Newark's charitable institutions which her grandparents were instrumental in founding. Miss Lathrop traces her lineage back through many generations of famous progenitors on both sides. Her maternal ancestors were among the early settlers of New Jersey, among them John Ogden, who received patent in 1664 for the purchase of Elizabethtown, and who in 1673 was

Establish Designator Keys (these are book dependent designators associated with a class):

- Ely: (b, BirthDate), (d, DeathDate), (m, MarriageDate), (died, DeathPlace), (died, DeathDate), (born, BirthDate), (bapt, ChristeningDate), ...(?)
- Kilbarchan: (m, MarriagePlace), (m, MarriageDate), (p, MarriagePlace), (p, MarriageDate), (born, BirthDate), (bom, BirthDate)
- Miller: (d, DeathDate), (d, DeathPlace), (BD, BurialDate), (BD, BurialPlace), (b, BirthPlace), (b, BirthPlace), (f, PARENT1), (m, PARENT2), (sp, SPOUSE), (daughter, CHILD), (daughters, CHILD), (son, CHILD), (sons, CHILD)

We can preset these for a book, but users should be able to add to the list. These are also LITs; the user should also be able to set other LITs that are not necessarily designators, e.g. and, son of, dau. of,

Default search phrases (two types):

1. In the presence of a designator LIT: search to the left for the first designator (if any); if its Class matches the name of the Form Field, generate the rule: “X ... E” where X is the designator LIT and E is the Extract, the filled in value.
2. No designator or a mismatch of Class: as before

EXTRA: a class that stops the look-ahead search for an Extract. (When a user sees that GreenQQ has gone beyond a list of sons, daughters, children, or spouses, the user can designate a LIT which when seen will stop the run-away list.)

Assumptions

- An ontology is prespecified (it supplies lexical-entity class names, non-lexical record objects, and relationship sets).
- LITs, KEYs, ALIASs(?) are system specified, but can be altered for a run of a book.
- DataFrame external representation templates (in terms of tokens) are prespecified.
- OCR of the book includes initial line tabs.

Instructions

1. Give the first and last page of the section of the book to be processed.
2. Determine the major grouping layout (individual, family, nested family).
3. Click on the name of the primary person in any one of the major groups. (Make sure that the displayed rectangles bound the major groups throughout the book: Click on any primary person incorrectly included in a bounding rectangle.) If the layout is “nested family”, repeat this step within a group for every level of nesting.
4. Click on the name of a child of any primary person and continue clicking on children of primary persons until all are highlighted.
5. Click on the name of a spouse of any person and then also on any marriage event date and marriage event place. Continue clicking until all spouses and their marriage event date and place are all highlighted.
6. Click on the properties of any person, spouse, or child. Continue clicking until all properties of every person, spouse, or child are all highlighted. (Properties: BirthDate, BirthPlace, ChristeningDate, ChristeningPlace, DeathDate, DeathPlace, BurialDate, BurialPlace, and also Parent1 and Parent2.)
7. For, nested families, repeat the process at each level of nesting. (Children of the next higher level will be automatically relabeled as primary persons. Spouses along with their properties and all other properties are likely to be already labeled.)

Click on the name of the primary person in any one of the major groups. Repeat for nested groups, if any.

Requirements for Realization

- Research
 - HWR (and OCR) for languages of interest
 - Auto-extraction (Machine Learning, **Pattern Recognition**, Natural Language Processing)
 - Bootstrapping/Improving auto-extraction from information gleaned only from Temple-Ready pipeline
 - ML: learning from minimal and potentially imperfect training data, active learning from corrections
 - **PR: rule generation from form-filled submissions to tree, rule-set update from corrections to auto-filled forms**
 - NLP: language learning from examples, both correct and incorrect
 - **Proof-of-concept prototype development**
- Implementation
 - Search repository
 - Enable hybrid keyword & semantic search
 - Handle corrections
 - Update repository based on rerun of auto-extraction
 - Form fill
 - Create interface
 - Auto-fill form
 - Support additions and corrections
 - Tree import
 - Duplicate detection
 - Information import

Workflow System Notes

- Path Codes
 - Q: Quick Test (3.2 > 6.PCF > PRF-report and also > 4.PCF)
 - T: Full Test (3.4 > 6.PCF > PRF-report and also > 4.PCF)
 - R: Book Run, from extraction to ingest ready (3.4 > 7.1)
 - U: User Alone, without extraction ensemble (1 > 4.PCF)
 - I: Index Batch, with or without extraction
- User Options (while in 4.PCF)
 - Ground Truth (only for those configuring and testing extraction tools)
 - Ingest Ready (only for those who are indexing)
 - Save Work
- Indexing
 - Control as before except without adjudicator and with the option to loop as desired
 - Loop: 4.PCF > 5.PCF > 6 > 6.PCF > 4.PCF
 - Finish when batch is ingest ready
- Error Processing (thoughts)
 - Fatal Errors: stop pipeline run and save current state, save log and include error message, alert administrator
 - Page Errors: if cumulative number exceeds a threshold, throw a fatal error
 - Summary Error Report: send to administrator (eventually, if no errors, auto-submit to search system and ...)

Miss Emma Goble Lathrop, official historian of the New York Chapter of the Daughters of the American Revolution, is one of the youngest members to hold office, but one whose intelligence and capability qualify her for such distinction. Miss Lathrop is not without experience; in her present home and native city, Newark, N. J., she has filled the positions of secretary and treasurer to the Girls' Friendly Society for nine years, secretary and president of the Woman's Auxiliary of Trinity Church Parish, treasurer of the St. Catherine's Guild of St. Barnabas Hospital, and manager of several of Newark's charitable institutions which her grandparents were instrumental in founding. Miss Lathrop traces her lineage back through many generations of famous progenitors on both sides. Her maternal ancestors were among the early settlers of New Jersey, among them John Ogden, who received patent in 1664 for the purchase of Elizabethtown, and who in 1673 was

Test Page(s): <page, e.g. 099> or <page list, 030, 031, 099> or <page range, e.g. 030-031>. Test Page(s) default is the most recent choice of test pages by the initiating tool for the book or, if none, the default is the range of pages specified for processing for the book.

Tools Included in Test Run: initialized by a check for the tool that initiated the test. Other tools can be added, in which case, the ensemble of tools checked is run.

Quick Test Type: extract, merge, split to forms, and display in COMET. (Allow for edit and creation of ground truth.)

Full Test Type: extract, merge, fix OCR & bad relationships, check constraints & authorities and add warnings, split to forms, display in COMET (allow edits and creation of ground truth), produce PRF reports, standardize, infer, generate GedcomX and import files.

We need a progress bar showing how much has been completed and also an abort button. (Perhaps in place of the Run button.)

Miss Emma Goble Lathrop, official historian of the New York Chapter of the Daughters of the American Revolution, is one of the youngest members to hold office, but one whose intelligence and capability qualify her for such distinction. Miss Lathrop is not without experience; in her present home and native city, Newark, N. J., she has filled the positions of secretary and treasurer to the Girls' Friendly Society for nine years, secretary and president of the Woman's Auxiliary of Trinity Church Parish, treasurer of the St. Catherine's Guild of St. Barnabas Hospital, and manager of several of Newark's charitable institutions which her grandparents were instrumental in founding. Miss Lathrop traces her lineage back through many generations of famous progenitors on both sides. Her maternal ancestors were among the early settlers of New Jersey, among them John Ogden, who received patent in 1664 for the purchase of Elizabethtown, and who in 1673 was
